Re: New purchasing requirements for non-visual access to technology

During the 1998 legislative session, Minn. Stat. 16B.104 related to non-visual access to technology was enacted into law. The law specifies minimum non-visual access standards to be used by state agencies when purchasing all information technology, including hardware, software and software upgrades. The law’s effective date was January 1, 1999.

While many common computer systems and applications comply with the new standards, some do not. The Department of Administration has been working with the Office of Technology, State Services for the Blind, hardware and software manufacturers, and visually impaired stakeholders to identify and resolve potential problems associated with implementation of the new standards. It is Admin’s intent to address exceptions to the standards on a case-by-case basis.

When purchasing information technology products and services, agencies should include the attached standards in the “Special Terms and Conditions” section of the solicitation document. For your convenience, the standards are included in MAPS as a buyer message, coded AMPZNV. In addition, we have included language with this memo that should be used in the-line item summary of the solicitation document used for technology purchases. The information provided in the line-item section will help Admin catalogue specific issues related to purchasing compliant goods and services.

Attached is a list of software that complies or partially complies with the mandates of the 1998 legislation pertaining to non-visual access to technology. This list is not all-inclusive. It is not an endorsement by the State Services for the Blind or the State of Minnesota of any product, but rather, is to serve as a basis for discussions with software providers regarding accessibility. If you have questions about the products listed or products that do not appear on the list, please contact David Andrews, State Services for the Blind, at 651.642.0500, or TTY, 651.642.0506.

If you have questions about the standards or about a specific purchase please contact Tom Trant (651.297.4354) or Brenda Willard (651.296.9075), or the appropriate Acquisition Management Specialist.

The Materials Management Division now provides automatic electronic updates on purchasing issues to agency staff by use of an e-mail list. If you received this on paper, you have not yet subscribed to the list. Please send an e-mail message to:
